

SIP Trunking

Streamline your network for maximum efficiency.

Consolidate the transmission of voice, data and other applications in several locations nationwide without the need for separate circuits for each service. Leverage IP data connectivity to run local, long distance, and private voice traffic.

The perfect voice and data solution

Improve business efficiency

- Reduce or eliminate the need for multiple circuits freeing up IT professionals' time
- Maximize unified communication features, allowing remote teams to easily access and collaborate with video conferencing, virtual white boarding and instant messaging

Easily manage costs

- Scalable price bundles allow you to only pay for what you need
- Reduce capital costs by using your existing IP communications equipment and phones†
- Enjoy competitive long-distance and international calling rates outside your IP network

Peace of mind with a reliable and secure network

- With the Shaw Business 'self-healing' MPLS network you can be assured that your voice service will be resilient
- Reduced hardware in each location allows for less potential points of failure
- Interoperability testing to ensure our SIP Trunking and your SIP enabled PBX work seamlessly

Shaw Business customers always enjoy the following benefits:

- 24/7/365 proactive technical monitoring by a trained Network Operations Centre (NOC), specialized to work with our business clientele
- Commitment to industry leading Mean Time To Repair service levels including local field technicians, regional distribution centres and comprehensive electronics sparing
